<p><b>5/15</b> Lettuce seeds* (4) (harvest 7/15 to 8/1) <b>8/1</b> Broccoli transplants (1)(harvest 10/1 to 11/30)</p>	<p><b>5/15</b> Pepper transplants (1) (harvest 8/15 to 10/15) <b>8/1</b> Beet seeds (9) (harvest 10/1 to 11/30)</p>	<p><b>5/15</b> Lettuce seeds* (4) (harvest 7/15 to 8/1) <b>8/1</b> Cabbage transplants (1) (harvest 10/1 to 11/15)</p>	<p><b>5/1</b> Marigold transplants (4) <b>9/15</b> Leaf lettuce seeds (4) (harvest 11/1 to 11/30)</p>

\* Notes: Numbers in parenthesis indicate how many seeds or plants to plant in the square.

\* Different herbs and/or flowers can be substituted for those on this plan. Different vegetables can also be substituted: eggplant and melons on the same schedule as tomatoes; cauliflower, collards and brussel sprouts on the same schedule as broccoli.

\* Plant heat-resistant lettuce varieties in May, plant leaf lettuce varieties in the fall.

# 15Thousand Farmers

## Planting Guide

### Summer

5/15: plant bush bean seeds, radish seeds, and heat resistant variety lettuce seeds  
transplant tomatoes and peppers  
plant marigold transplants

6/1: transplant cucumber or summer squash

6/15: plant bush bean  
transplant herbs - basil, parsley, etc.

7/1: plant bush bean seeds

### Fall

8/1: plant beet, spinach, and kale seeds  
transplant cabbage and broccoli

9/1: plant radish and leaf lettuce seeds

9/15: plant radish and leaf lettuce seeds

\*Notes: Summer squash and cucumbers will require a trellis and tomatoes will have to be supported by a trellis or a stake.

For the summer garden, plant heat resistant lettuce varieties, for the fall garden, choose leaf lettuce varieties.
